

**POLLUTION PREVENTION AND CONTROL ACT 1999  
ENVIRONMENTAL PERMITTING (ENGLAND AND WALES) REGULATIONS 2010  
( as amended)**

**Permit Number: 3.5/057489/CP**

**Installation Address:**

Hague Plant Ltd  
Jubilee House  
Claywheels Lane  
Sheffield  
S6 1LZ

**In accordance with Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010 as amended, Hague Plant Ltd is hereby permitted to operate a scheduled activity as mobile plant, carrying out the crushing and screening of Brick, Tiles, Concrete, Demolition Waste and any other designated mineral as described in Schedule 1, Part 2, Chapter 3, Section 3.5, Part B, subsection (a) and (c) and subject to the following conditions of this Permit.**

Signed

Dated this day: 3<sup>rd</sup> July 2013

**Assistant Manager  
Authorised by Sheffield City Council to sign on their behalf**

---

The Secretary of States Guidance PG 3/16 (12) for Mobile Crushing and Screening has provided the framework for the conditions in this permit

**Name & Address of Operator:**

Hague Plant Limited  
Jubilee House  
Claywheels Lane  
Sheffield  
S6 1LZ

Contact: Mr Hague (0114) 2834970

## **Explanatory Note to Pollution Prevention and Control Permit for Part B Installations.**

**(This note does not form a part of the Permit)**

The following Permit is issued under Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010 (amended), to operate an installation carrying out activities covered by the description in section 3.5, Chapter 3 of Schedule 1 of those Regulations, to the extent authorised by the Permit:

### **Process Changes**

As part of your permit you are required to notify the Council of any proposed change in operation at least 14 days before making the change. This must be in writing and must contain a full description of the proposed change in operation and the likely consequences. Failure to do so is an offence.

If you consider that a proposed change could result in the breach of the existing permit conditions or is likely to require the variation of permit conditions then you may apply in writing under Regulation 20(1) of the EP Regulations. Additionally, if this involves a SUBSTANTIAL CHANGE to the installation you will be required to submit an application, pay the relevant fee and advertise the application accordingly. You may serve a Notice on the Council requesting that they determine whether any change that is proposed would constitute a substantial change before you proceed with application.

### **Variations to the Permit**

The Permit may be varied in the future (by the Council serving a Variation Notice on the Operator). If the Operator itself wants any of the Conditions of the Permit to be changed, a formal Application must be submitted.

### **Surrender of the Permit**

Where the operator of a Part B installation or mobile plant ceases or intends to cease the operation of the activity the operator may notify the regulator of the surrender of the whole permit, in any other case, notify the regulator of the surrender of the permit in so far as it authorises the operation of the installation or mobile plant which he/she has ceased or intends to cease operating. The notification shall contain information as described in Regulation 24 or 25 of the EP Regulations.

### **Transfer of the Permit or Part of the Permit**

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by both the existing and proposed holders, in accordance with Regulation 21 of the EP Regulations. A transfer will be

---

allowed unless Sheffield City Council considers that the proposed holder will not be the person who will have control over the operation of the installation or will not ensure compliance with the conditions of the transferred Permit.

### **Annual Subsistence Fee**

In accordance with Regulation 65 of the EP Regulations, the holder of a permit is required to pay a fee for the subsistence of the Permit. This fee is payable annually on 1st April. You are advised that under the provisions of Regulation 65 (5) of the EP Regulations, if you fail to pay the fee due promptly, Sheffield City Council may revoke the Permit. You will be contacted separately each year in respect to this payment.

### **Public Register**

The Council is required by Regulation 46 of the EP Regulations to maintain a Public Register containing information on all LAPPC installations and mobile plant. The register is available for inspection by the public free of charge during office hours (Monday to Friday 9.00 am to 5.00 pm) at the following address:

Environmental Protection Service  
Sheffield City Council  
2-10 Carbrook Hall Road  
Carbrook  
Sheffield  
S9 2DB

Tel: 0114 273 4651

### **Confidentiality**

Sheffield City Council has a duty to consider the question of confidentiality of information supplied to it. If any information supplied is considered confidential, a statement of which information this applies to and the reasons why it is considered confidential should be specified. The Operator is reminded that he may apply to Sheffield City Council for the exclusion of information from the public register under the provisions of the Environmental Permitting (England and Wales) Regulations 2010

### **Appeals**

Under Regulation 31 of the EP Regulations operators have the right of appeal against the conditions attached to their permit. Schedule 6 of the EP Regulations sets out the detailed procedures.

Appeals against a Variation Notice do not have the effect of suspending the operation of the Notice. Appeals do not have the effect of suspending Permit conditions.

---

Notice of appeal against the conditions attached to the permit must be given within six months of the date of the Notice, which is the subject matter of the appeal.

## **How to Appeal**

There are no forms or charges for appealing. However, for an appeal to be valid, appellants (the person/operator making the appeal) are legally required to provide:

- Written notice of the appeal;
- A statement of the grounds of appeal;
- A statement indicating whether the appellant wishes the appeal to be dealt with by written representations procedure or a hearing - a hearing must be held if either the appellant or enforcing authority requests this, or if the Planning Inspector or the Secretary of State decides to hold one.
- (Appellants must copy the above three items to the local authority when the appeal is made)
- A copy of any relevant application;
- A copy of any relevant permit;
- A copy of any relevant correspondence between the appellant and the regulator; and
- A copy of any decision or notice, which is the subject matter of the appeal.

## **Where to Send Your Appeal Documents**

Appeals should be addressed to:

**The Planning Inspectorate  
Environmental Appeals Administration  
Room 4/19 - Eagle Wing  
Temple Quay House  
2 The Square  
Temple Quay  
Bristol BS1 6PN**

In the course of an Appeal process the main parties will be informed of procedural steps by the Planning Inspectorate.

To withdraw an appeal the appellant must notify the Planning Inspectorate in writing and copy the notification to the local authority.

---

## **Description of Activities**

The use of a Extec C12+ crusher, Serial No 10842, and its associated Chieftan Powerscreen, and a Trommel 830 Powerscreen housed internally, for the crushing and subsequent screening of concrete, bricks, stone, tiles and other designated minerals.

This process includes the stockpiling and movement within the site of crushed material, and is to be carried out within the boundary of the crusher and screeners as outlined in red on the attached plan in schedule 2.

## Conditions of Permit.

### 1.0 Asbestos

1.1 Asbestos shall not be crushed or screened.

### 2.0 Notifications

2.1 The operator shall, before the mobile plant is operated, notify the Local Authority of the site where the mobile plant is to be operated, and Sheffield City Council's Environmental Protection Service who issued the permit:

- a. where and when the mobile plant is expected to start operating, and
- b. the serial numbers of the mobile plant involved.

Note: The Notification form in Schedule 1 of this permit can be used as a template.

2.2 The operator shall submit to Sheffield City Council's Environmental Protection Service, who issued the permit, any changes to the list of permitted plant. The plant new to the list shall not be used until this department has approved the alteration to the list of permitted plant.

### 3.0 Emissions and monitoring

3.1 No visible particulate matter shall be emitted beyond the installation boundary.

3.2 The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with.

Substance	Source	Emission limit/provisions	Type of monitoring	Monitoring frequency
Particulate matter	Whole process	Avoidance of visible emissions crossing the (construction) site boundary	Recorded operator observations	On start up and on at least two more occasions each day
Smoke	engines	No visible smoke during normal operation	*Recorded operator observations	*On start up and on at least two more occasions each day

3.3 All plant and equipment capable of causing, or preventing, emissions shall

---

be maintained in accordance with the manufacturer's instructions. Records shall be kept of such maintenance.

3.4 In the case of abnormal emissions, malfunction or breakdown leading to abnormal emissions the operator should:

- Investigate and undertake remedial action immediately;
- Adjust the process or activity to minimise those emissions; and
- Promptly record the events and actions taken;
- Stop operations if the water suppression fails.

3.5 The regulator should be informed without delay, whether or not there is relating monitoring showing an adverse result:

- If there is an emission that is likely to have an effect on the local community; or
- In the event of the failure of key arrestment plant, for example, water suppression or water supply.

#### 4.0 **Aggregates delivery and storage**

4.1 No material should be stored in the open except for:

- material that has been screened to remove material 3 mm and under;
- sand;
- scalpings;
- material used for road sub-bases (commonly known as "MOT material", or "type 1" or "type 2" material) that has been conditioned before deposition;
- crusher run material that has been conditioned before deposition.

4.2 All processed materials that have not been screened to remove material under 3mm should be conditioned with water or proprietary conditioning agents at or before the point of discharge onto the stockpile.

4.3 When using storage bays, storage height should be lower than external walls of the bays unless suppression is provided to control emissions. Stock should not be piled forward of the bay.

4.4 Where dusty materials are stored, stockpiles should be wetted where necessary to minimise dust emissions. Fixed water sprays should be installed for long term stocking areas if appropriate.

4.5 Stockpiles should be suitably profiled and conditioned with water or proprietary conditioning agents, according to weather conditions.

---

## 5.0 **Crushers and Screening Unit**

- 5.1 Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture.
- 5.2 Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.
- 5.3 Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.
- 5.4 The discharge from crushers and screens onto conveyors or into other equipment should be enclosed as far as is practicable.

## 6.0 **Belt conveying**

- 6.1 Where dusty materials are conveyed, the conveyor and any transfer points should be provided with adequate protection against wind whipping.
- 6.2 Where the design of the conveyor allows free fall of material to occur, techniques should be used at the point of discharge to minimise this, for example the use of a chute or similar equipment.
- 6.3 Where water is available it should be used at conveyor discharge points for dust suppression. (This may not be necessary where the material has already been screened to remove material under 3mm size.)
- 6.4 The last metre of any final size discharge conveyor or stockpile discharge conveyor and the first 0.5 metre of the free fall of materials from conveyors carrying material of a consistent size and shape, should be fitted with a full hood. (The hood ensures that the application of water from spray bars at this point is most effective.)
- 6.5 The conveyors should be fitted with means for keeping the belt clean.

## 7.0 **Loading, unloading and transport**

- 7.1 Vehicles should be loaded in such a way as to minimise airborne dust emissions, for example by loading with wet materials, or by using a load out area protected by enclosure or a dust suppression system.
- 7.2 The Vehicle should be sheeted or otherwise totally enclosed as soon as possible after loading and before leaving the site. This need not be applied to the loading of crushed materials greater than 75mm.

---

## **8.0 Roadways and transportation**

- 8.1 All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair, or shall be kept wet. Quarry haul roads are excluded from this provision.
- 8.2 Vehicles shall not track material from the site onto the highway. Where necessary, wheel cleaning facilities should be provided and used by vehicles before leaving the site.

## **9.0 Records and training**

- 9.1 Written or computer records of all tests and monitoring shall be kept by the operator for at least 2 years. They, and a copy of all manufacturers' instructions, shall be made available for examination by the Council. Records shall be kept of operator inspections, including those for visible emissions.
- 9.2 Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken.

## **10 Best Available Technique**

- 10.1 The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.

**Schedule 1 – Mobile Crusher Movement Notification Form**

This information shall be provided to Sheffield City Council Environmental Protection Service **and** the Local Authority in whose area the Permitted plant is to be located.

The information shall be sent at least **7 days prior to any relocation**. Where this is not possible, the Comments section shall be completed to explain the reasons.

<b>To:</b>	Sheffield City Council Environmental Protection Service  Fax: (0114) 273 6464	Details of Local Authority where crusher is to be located.
